FOR IMMEDIATE RELEASE

Actronix, Inc. Names Edge Electronics as Company's First Distributor

FLIPPIN, Ark. (May 1, 2008) – Actronix, Inc., a cable and wire harness assembly manufacturer, announced today the selection of Edge Electronics, Inc. as the company's first distributor.

Edge Electronics is a woman-owned company based in New York with offices in New Jersey, Massachusetts, Florida and California. With a focus on electronic component distribution, Edge will aid Actronix in identifying and providing custom solutions to customers in medical, instrumentation, communications and security and defense industries.

“Part of the fundamental success of Actronix is matching customers with highest-quality product for their applications,” said Tim Grant, president and chief executive officer for Actronix. “Through this partnership with Edge Electronics, Actronix will have a greater bandwidth to meet our customers' needs.”

According to Edge's president and CEO, Adrienne Giannone, Edge is very selective in choosing its business partners. However, Giannone says the company was immediately impressed with Actronix. Giannone found the Actronix's commitment to quality and dedication to keeping manufacturing jobs in the United States refreshing. Additionally, she was intrigued by Actronix's partnership with the Arkansas Department of Corrections, which helps rehabilitate and train the state's women's prison inmates.

“Our core values and product offering are very synergistic with Actronix,” said Giannone. “This collaboration is a win-win, and provides a total solution to our customers.”

2-2-2/ EDGE Named Actronix's Distributor

About Actronix, Inc.

Founded 30 years ago in Flippin, Ark., Actronix, Inc. is an American manufacturer of highly-engineered cable assemblies, wiring harnesses and high-level assemblies for industrial consumers. The company specializes in products for a variety of industries including medical, instrumentation, communications and security and defense. In addition to corporate offices and a manufacturing facility in Flippin, Actronix has a second facility in Newport, Ark. Through an innovative partnership with the Arkansas Department of Corrections, this facility is located on the grounds of McPherson Women's Unit.
